

Anas Ahmed Hasan

Front-End Developer

Alexandria, Egypt | [01284838592] | [ansalking150@gmail.com]

Portfolio: ansalking150.github.io/my-portfolio- | Live projects: hegazytexgroup.com, px-store.vercel.app

PROFESSIONAL SUMMARY

Front-End Developer with hands-on freelance experience building and shipping bilingual (Arabic/English, RTL/LTR) websites for real clients using React and Vite, deployed on Vercel. Skilled in translating client requirements into responsive, SEO-optimized, production-ready interfaces, including custom checkout flows and multi-method payment integrations. Works efficiently with AI-assisted coding tools (prompt engineering with Antigravity) to accelerate development without compromising code quality. Currently building toward full-stack development. Also brings a graphic design background that supports strong UI/visual decisions on the front end.

TECHNICAL SKILLS

- Languages & Libraries: HTML, CSS, JavaScript, React
- Tooling & Deployment: Vite, Vercel, DNS configuration (Hostinger), Git-based workflow
- AI-Assisted Development: Prompt engineering for AI coding tools (Antigravity) to build and iterate on front-end code
- Internationalization: Bilingual Arabic/English website development with RTL/LTR support
- UI/UX & Design: Responsive design, Figma, graphic design background
- SEO: On-page SEO, React Helmet Async, Google Search Console, sitemap submission and indexing
- Integrations: WhatsApp-based checkout flows, multi-method payment/checkout systems

PROJECT EXPERIENCE

Front-End Developer (Freelance) — NEGM GLOBAL TEX (HG TEX) — hegazytexgroup.com

- Built a bilingual (Arabic/English) e-commerce and corporate website for a uniform and garment manufacturing company using React and Vite, deployed on Vercel
- Implemented a WhatsApp-based checkout flow and a product catalog organized by industry vertical
- Set up on-page SEO with React Helmet Async and Google Search Console; configured DNS in Hostinger and submitted a sitemap for indexing
- Client purchased a custom domain; site is search-optimized and indexed on Google

Front-End Developer (Personal Project) — PX Store — px-store.vercel.app

- Developed a PlayStation/Xbox-themed gaming e-commerce storefront as a single-page application
- Built a multi-method payment and checkout system (Cash Wallet, InstaPay, Vodafone Cash, Fawry, Tilda) with conditional screenshot upload verification
- Built a bilingual PlayStation Plus subscription pricing page with RTL support
- Conducted an SEO audit, identifying and resolving indexing and metadata issues

Additional Front-End Work — Wave_Dev (Freelance)

- Delivered a restaurant website with an admin dashboard and authentication system
- Built multiple website templates showcased in personal portfolio

EDUCATION & TRAINING

- Studying Front-End / Full-Stack Web Development (ongoing)

ADDITIONAL SKILLS

- Digital marketing (social media management, media buying, paid ad campaigns), video editing, and AI-generated content creation
- Laptop and computer hardware troubleshooting and maintenance
